OVERVIEW

What is Ritimus?

Ritimus is an educational mobile application that helps children learn through play. It offers more than 100 smart games designed to strengthen core cognitive and motor skills while keeping children engaged and motivated.

The approach is inspired by the Montessori method: children explore, make choices, and learn at their own pace. Activities are colorful, age-appropriate, and structured so that difficulty grows with the child.

Designed for parents, too

Parents can follow their child's development with built-in progress tracking. Clear reports show how a child is advancing across different skill areas, making it easy to celebrate wins and spot areas that need extra attention.

WHY RITIMUS

Key Features & Benefits

- **Attention & focus**
  Games that reward sustained concentration help children build longer attention spans.
- **Reaction time**
  Fast, playful challenges sharpen reflexes and quick decision-making.
- **Problem solving**
  Puzzles and logic activities encourage children to think, plan, and try new strategies.
- **Motor skills**
  Touch-based interactions develop hand-eye coordination and fine motor control.
- **Parental progress tracking**
  Simple dashboards let parents monitor growth across every skill area.
- **Safe & age-appropriate**
  A child-friendly environment with content tailored to early learners.

LEARNING OUTCOMES

Skills Children Build

Attention | Memory | Logic | Numbers | Letters & words | Reaction time | Problem solving | Hand-eye coordination | Observation | Patience

Each game maps to one or more of these skill areas. As children play across the library, they build a balanced mix of cognitive and motor abilities, reinforced through repetition and gradually increasing challenge.

Growth you can see

Progress tracking turns everyday play into measurable development, so parents always know where their child is thriving and where a little more practice helps.

100+ SMART GAMES

A Sample of the Games

A small selection from the Ritimus game library:

- **Opposite Words**
  Match words with their opposites to grow vocabulary.
- **Hidden Letters**
  Find letters tucked into busy scenes to sharpen observation.
- **Pop the Bubbles**
  A reaction-time game that rewards quick, accurate taps.
- **Journey in Space**
  An exploration game mixing motor skills and focus.
- **Repair Time**
  Solve step-by-step tasks to strengthen problem solving.
- **Catch the Letters**
  Tap the right letters as they appear to train attention.
- **Number Hunter**
  Spot and collect numbers to build early math sense.
- **Sort it Right**
  Arrange items in the correct order to practice logic.
- **Know the Animals**
  Recognize and name animals to expand knowledge.
- **Full Basket**
  A playful counting challenge for little hands.

SIMPLE BY DESIGN

How Families Use Ritimus

1 — Download

Install Ritimus from the App Store or Google Play on a phone or tablet.

2 — Play & learn

The child picks from 100+ games; difficulty adapts as they improve.

3 — Track progress

Parents open the dashboard to see development across skill areas.

4 — Grow together

Use insights to encourage practice and celebrate milestones.

GET RITIMUS
